SUMMARY

Full-Stack Developer skilled in MERN Stack, REST API Development, Authentication, CRUD Operations, API Integration, and Responsive Web Development. Experienced in building scalable AI-powered applications using React.js, Node.js, Express.js, MongoDB, Gemini API, Python, and OpenCV with strong problem-solving and collaborative development skills.

EDUCATION

G H Patel College of Engineering & Technology (CVM University)

Aug 2024 – May 2028

Bachelor of Technology in Computer Engineering

- **Current CGPA:** 8.6 / 10 (Currently pursuing 5th semester)

ACHIEVEMENTS

- **CVMU Hackathon 2026 Finalist:** Led a 4-member development team through the final intensive round.
- **PDPU Hackathon 2026 Finalist:** Qualified for the highly competitive national-level final evaluation.
- **Problem Solving:** Solved 65+ LeetCode problems focusing heavily on Data Structures and Algorithms (DSA).

PROJECTS

Saheli – Smart PCOS Care Platform

MERN Stack, Gemini API, Python, OpenCV

- Built an AI-powered healthcare platform architected with three distinct patient, doctor, and administrator portal workflows.
- Integrated secure user authentication, optimized REST APIs, MongoDB schema management, and automated appointment workflows.
- Applied OpenCV-based physical symptom analysis and Gemini AI recommendations to formulate personalized wellness insights.
- Enhanced digital patient experience through responsive UI components, real-time chatbot support, and tailored tracking feeds.

Spot Wave – Music Streaming Player

JavaScript (ES6+), HTML5, CSS3, Web Audio API

- Created a Spotify-inspired responsive music application featuring fluid user experience and dynamic playlist rendering.
- Implemented custom interactive playback features including precise seek bar navigation, volume sliders, and controls via native JavaScript audio API management.

StreamFlix–Multi-PagePortal

HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB Atlas

- Developed a full-stack movie streaming platform featuring 140+ movies and TV shows with dynamic content rendering and trailer integration.
- Implemented user authentication, personalized watchlist functionality, and cloud-hosted data management using MongoDB Atlas.

Real-Time Stock Screener Dashboard

React.js, Next.js, TypeScript, Zustand, TanStack Table

- Built a real-time stock screener supporting 5,000+ stock records with advanced filtering and search.
- Developed interactive stock charts and technical indicators for market analysis.
- Optimized performance using virtualization and efficient state management.

TECHNICAL SKILLS

Languages:	C, C++, JavaScript, Python, Java
Frontend:	HTML5, CSS3, Tailwind CSS, React.js, Framer Motion
Backend:	Node.js, Express.js, REST APIs, User Authentication, CRUD Operations
Databases:	MongoDB, Supabase
Tools & Platforms:	Git, GitHub, Postman, Figma, Vercel
Core Concepts:	MERN Stack, API Integration, Responsive Design, Full-Stack Development

SOFT SKILLS

- Problem Solving, Analytical & Critical Thinking
- Team Collaboration, Direct Ownership & Technical Leadership
- Effective Communication, Presentation & Documentation Skills
- Agile Methodology Adaptability & High Ownership
